Storage Conditions
ESM-CCVP Clear Calendered Vinyl Permanent should be handled with care to prevent surface contamination that may affect the printable surface of the product. This calendered vinyl film should be processed and stored in an environment of 65° - 85° F (18° - 29° C) and 30 - 50% relative humidity (non-condensing) that is clean and relatively dust-free. It is recommended to store this product in its original packaging in a cool dry area until ready for use. If storage conditions are outside the recommended operating ranges, allow the material to acclimate to the production environment for at least 24 to 48 hours before use.

Roland Certified Media Guarantee
This product is sold for the usage of the applications stated in this document. The product is free of defects, and produces vibrant, printed graphics when used with TrueVIS, EJ, Eco-Sol MAX and MAX 2 inks.
