

Introducing | A Translucent Cast Vinyl

Lumina[®] 2520 is a premium cast vinyl film that is ideal to be used in backlit signage. This new series is an improvement over the Lumina[®] 2500 Series because it features a synthetic liner opposed to a standard paper liner. The new synthetic liner will make it easier for cutting and weeding, also making installation easier when using the

wet application method. The 2 mil film is available in 26 colors across the spectrum with new colors on the way! With a seven-year outdoor durability, users can rest assured knowing that their graphics will stand the test of time.

**Exceed
the
expected.**

**Backlit
Application**

**7 Year
Outdoor Durability**
